

C-Terminal of EIA Binding Protein I Enhances the Migration of Gastric Epithelial Cells and Has a Clinicopathologic Significance in Human Gastric Carcinoma [Retraction]

Wang C, Wang M, Xing B, et al. *Onco Targets Ther*. 2019;12:5189–5200.

The Editor and Publisher of *OncoTargets and Therapy* wish to retract the published article. It came to our attention that images in Figure 4E had allegedly been duplicated, specifically:

- Figure 4E panel Scramble 0h appears to be duplicated with Figure 4E panels CTBP1-RNAi and JAK1-RNAi 0h, with all images showing evidence of frame shifting.
- Figure 4E panel CTBP1-RNAi 12h appears to be duplicated with Figure 4E JAK1-RNAi 24h.

The authors were unable to provide a satisfactory explanation for the alleged duplication nor were they able to provide the raw data for their study. The Editor determined the findings of the study are no longer valid and requested for the paper to be retracted.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as "Retracted".

OncoTargets and Therapy

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic

agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
