

Magnitude of Surgical Site Infections, Bacterial Etiologies, Associated Factors and Antimicrobial Susceptibility Patterns of Isolates Among Post-Operative Patients in Harari Region Public Hospitals, Harar, Eastern Ethiopia [Corrigendum]

Shakir A, Abate D, Tebeje F, Weledegebreal F. *Infect Drug Resist.* 2021;14:4629–4639.

The authors have advised there is an error in the author list and affiliation 1 on page 4629. The author name “Fitsum Weledegebreal” should read “Fitsum Weldegebreal” and in affiliation 1 “Jugal Regional Hospital” should read “Jugal General Hospital”.

In addition, the authors have advised there is an error in the Funding statement on page 4638. The text “Fund for data collection for this research was covered by Haramaya university postgraduate directorate” should read “Fund for data collection for this research was covered by Jugal General Hospital”.

The authors apologize for these errors.

Publish your work in this journal

Infection and Drug Resistance is an international, peer-reviewed open-access journal that focuses on the optimal treatment of infection (bacterial, fungal and viral) and the development and institution of preventive strategies to minimize the development and spread of resistance. The journal is specifically concerned with the epidemiology of

antibiotic resistance and the mechanisms of resistance development and diffusion in both hospitals and the community. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
