CORRIGENDUM

Integrated Management Strategies for Epidermolysis Bullosa: Current Insights [Corrigendum]

Sait H, Srivastava S, Saxena D. Int J Gen Med. 2022;15:5133-5144.

The authors have advised that the Figures were labelled incorrectly and Figure 1 should appear in the paper as Figure 2 and vice versa.

Page 5134, Figure 1, the correct figure is as follows.

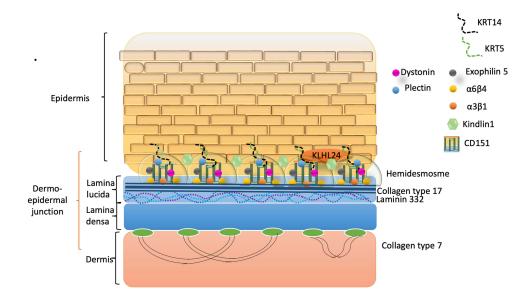

Figure 1 The 4 layers of skin with dermo-epidermal junctions and corresponding genes involved in the maintenance of their integrity. Basal keratinocytes secrete *KRT5* and *KRT14*, which form the intermediate filaments and interact with other cytoskeletal proteins in epidermis and lamina lucida to provide integrity and adhesion. Gain of function mutations in *KLHL24* gene leads to breakdown of intermediate filaments.

Page 5137, Figure 2, the correct figure is as follows.

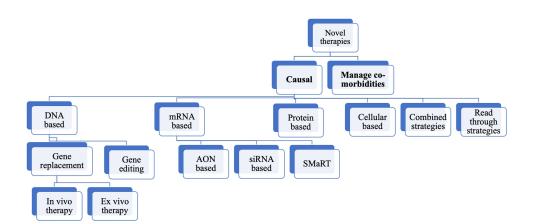

Figure 2 Various novel therapeutic strategies that are being explored in management of epidermolysis bullosa. Abbreviations: AON, Anti sense oligonucleotide; SMaRT, Spliceosome-mediated RNA trans-splicing.

The authors apologize for the error.

International Journal of General Medicine

Publish your work in this journal

The International Journal of General Medicine is an international, peer-reviewed open-access journal that focuses on general and internal medicine, pathogenesis, epidemiology, diagnosis, monitoring and treatment protocols. The journal is characterized by the rapid reporting of reviews, original research and clinical studies across all disease areas. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
