

Meg3 Induces EMT and Invasion of Glioma Cells via Autophagy [Retraction]

Yang Z, Bian E, Xu Y, et al. *Onco Targets Ther.* 2020;13:989–1000.

The Editor and Publisher of *OncoTargets and Therapy* wish to retract the published article. Concerns were raised regarding the alleged duplication of cell invasion and migration images in Figures 1 and 6. Specifically,

- Figure 1E, invasion, U251 vector, appears to have been duplicated with Figure 6D, invasion, U251 Control.
- Figure 6C, migration, U87 Control, appears to have been duplicated with Figure 6D, invasion, U251 Lys05.

The authors responded to our queries but were unable to provide a satisfactory explanation regarding the duplicated images, nor were they able to provide original data that could adequately verify the findings. The decision was made to retract the article and the authors have agreed with this.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
