

Forkhead Box Protein A1 is a Prognostic Predictor and Promotes Tumor Growth of Gastric Cancer [Retraction]

Ren H, Zhang P, Tang Y, Wu M, Zhang W. *Onco Targets Ther.* 2015;8:3029–3039.

At the authors request, the Editor and Publisher of *OncoTargets and Therapy* wish to retract the published article. The authors requested a retraction due to the lack of reproducibility of the results described in Figure 7. However, the authors were unable to provide any original data for their study and could not explain the alleged duplication of western blot images in Figures 5 and 7. Specifically,

- Western blot bands for Figure 5B, FOXA1 and GAPDH, appear to have been duplicated with western blot bands for Figure 7D, YAP and GAPDH.

The Editor agreed with the decision to retract the paper.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
