

Long Noncoding RNA UCA1 Promotes the Proliferation, Invasion, and Migration of Nasopharyngeal Carcinoma Cells via Modulation of miR-145 [Retraction]

Wu J, Du M, Zhang Q, et al. *Onco Targets Ther.* 2018;11:7483–7492.

We, the Editors and Publisher of *OncoTargets and Therapy*, have retracted the following article.

Since publication, concerns have been raised about the integrity of the data in the article. This includes the duplication of images from Figures 2 and 4. Specifically,

- The images for Figure 2E, CNE-2, Migration, si-UCA1 and Invasion, siRNA-NC, have been duplicated with the images for Figure 4C, CNE-2, Migration, Inhibitor NC+si-UCA1 and Inhibitor NC+siRNA-NC, respectively.
- The images for Figure 4C, 5–8 F, Migration and Invasion, Inhibitor NC+si-UCA1, have been duplicated.

When approached for an explanation, the authors did not respond to our queries, nor did they provide original data for their study. As the findings could not be verified the Editor and Publisher made the decision to retract the article and the authors were notified of this.

We have been informed in our decision-making by our editorial policies and COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
