RETRACTION

## MicroRNA-145-5p Inhibits Gastric Cancer Invasiveness through Targeting N-Cadherin and ZEB2 to Suppress Epithelial-Mesenchymal Transition [Retraction]

Jiang SB, He XJ, Xia YJ, et al. Onco Targets Ther. 2016;9:2305-2315.

We, the Editors and Publisher of OncoTargets and Therapy, have retracted the following article.

Since publication, concerns have been raised about the integrity of the data in the article. When approached for an explanation, the authors were cooperative but were unable to address the concerns raised and have not been able to provide sufficient supporting information. As verifying the validity of published work is core to the integrity of the scholarly record, we are therefore retracting the article. The authors were informed of this decision and do not agree with the retraction.

We have been informed in our decision-making by our editorial policies and COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as 'Retracted'.

## Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
