

LAMP5, One of Four Genes Related to Oxidative Stress That Predict Biochemical Recurrence-Free Survival, Promotes Proliferation and Invasion in Prostate Cancer [Retraction]

Wu P, Zhang J, Guo L, Chen B, Xiong L, Du Y. *Adv Appl Bioinform Chem.* 2024;17:119–138.

We, the authors and Publisher of the journal *Advances and Applications in Bioinformatics and Chemistry* are retracting the published article.

Since publication, the authors noticed that due to a parameter error in the R-based random forest analysis, LAMP5 was identified as the central gene instead of AURKA. As this error directly impacts the reported results and conclusions the authors alerted the issue to the Publisher, and all have agreed to retract the article to ensure correction of the scholarly record.

We have been informed in our decision-making by our editorial policies and the COPE guidelines. The retracted articles will remain online to maintain the scholarly record, but they will be digitally watermarked on each page as “Retracted”.

Advances and Applications in Bioinformatics and Chemistry

Dovepress
Taylor & Francis Group**Publish your work in this journal**

Advances and Applications in Bioinformatics and Chemistry is an international, peer-reviewed open-access journal that publishes articles in the following fields: Computational biomodelling; Bioinformatics; Computational genomics; Molecular modelling; Protein structure modelling and structural genomics; Systems Biology; Computational Biochemistry; Computational Biophysics; Chemoinformatics and Drug Design; In silico ADME/Tox prediction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
