## Dear editor

We are very pleased to hear from Doctor Nir Erdinest and Doctor Itay Lavy. In the letter, the two doctors put forward many constructive comments on our case report.

We appreciate their contributions and thoughts regarding this important topic. The only clarification point is regarding the OCT image. It is not an AS-OCT for that eye; it is a photographic image captured through the OCT machine.

Again, thank you so much for your contribution.

Publish your work in this journal

Clinical Optometry is an international, peer-reviewed, open access journal publishing original research, basic science, clinical and epidemiological studies, reviews and evaluations on clinical optometry. All aspects of patient care are addressed within the journal as well as the practice of optometry including economic and business analyses. Basic and clinical research papers are published that cover all aspects of optics, refraction and its application to the theory and practice of optometry. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
