

Upregulation of SHIP2 Participates in the Development of Breast Cancer via Promoting Wnt/ β -Catenin Signaling [Retraction]

Zhou J, Di M, Han H. *Onco Targets Ther.* 2019;12:7067–7077.

We, the Editors and Publisher of the journal *OncoTargets and Therapy* have retracted the published article.

Following publication, image integrity concerns were raised regarding Figures 2C, 2D, 2F, 3A, 3C, 4, 5B, 6A and 6D. The authors also contacted the journal to request a withdrawal of their article and later requested a correction to Figure 6A.

When asked for further information and an explanation for the image concerns, the authors were unable to address the concerns raised.

As verifying the validity of published work is core to the integrity of the scholarly record, we are therefore retracting the article. The authors listed in this publication have been informed. The corresponding author has agreed to retract the article.

We have been informed in our decision-making by our editorial policies and the COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as 'Retracted'.

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
