

Pro-Angiogenic Effects of Essential Oil from *Perilla frutescens* and its Main Component (Perillaldehyde) on Zebrafish Embryos and Human Umbilical Vein Endothelial Cells [Retraction]

Zhou F, Dai O, Peng C, et al. *Drug Des Devel Ther.* 2021;15:4985–4999.

We, the Editors and Publisher of the journal, *Drug Design, Development and Therapy* have retracted the published article.

After publication, concerns were raised by a third party about the integrity of the data in the article. Subsequently, the authors contacted the Journal requesting the correction of their article.

Further investigation conducted by the Journal and Publisher confirmed duplicate image panels representative of different treatment conditions present in Figure 7 and 8 of the article. When approached for an explanation, the authors provided raw data and the relevant documentation, however, data integrity concerns remain in the raw data provided.

As verifying the validity of published work is core to the integrity of the scholarly record, we are therefore retracting the article. The corresponding author listed in this publication has been informed.

We have been informed in our decision-making by our editorial policies and the COPE guidelines. The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as 'Retracted'.

Drug Design, Development and Therapy is an international, peer-reviewed open-access journal that spans the spectrum of drug design and development through to clinical applications. Clinical outcomes, patient safety, and programs for the development and effective, safe, and sustained use of medicines are a feature of the journal, which has also been accepted for indexing on PubMed Central. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
