

MCU-Mediated SIRT3 Inhibition Drives Oxidative Stress-Induced Cytoskeletal Disruption in Pancreatic Ductal Epithelium: A Mechanism of Hypertriglyceridemic Acute Pancreatitis [Retraction]

Hong J, Fu Q, Zhu L, et al. *Int J Gen Med*. 2025;18:5195–5211.

We, the Editors and Publisher of the journal *International Journal of General Medicine*, have retracted the published article.

After publication, the authors contacted the Journal and requested the retraction of the article due to errors that occurred during the original data processing and study execution.

Further investigations conducted by the Journal and Publisher confirmed unexpected similarities between the immunofluorescence images in Figure 4D and Figure 6D that are representative of different samples and treatment conditions.

As the Editor and Publisher also have concerns about the integrity of the reported results, all parties have agreed to retract the article to ensure the correction of the scholarly record.

We have been informed in our decision-making by our editorial policies and the COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as 'Retracted'.

International Journal of General Medicine

Publish your work in this journal

The International Journal of General Medicine is an international, peer-reviewed open-access journal that focuses on general and internal medicine, pathogenesis, epidemiology, diagnosis, monitoring and treatment protocols. The journal is characterized by the rapid reporting of reviews, original research and clinical studies across all disease areas. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
