

Targeted Multifunctional Nanoplatfor for Imaging-Guided Precision Diagnosis and Photothermal/Photodynamic Therapy of Orthotopic Hepatocellular Carcinoma [Retraction]

Qi S, Liu G, Chen J, et al. *Int J Nanomedicine*. 2022;17:3777–3792. <https://doi.org/10.2147/IJN.S377080>

We, the Editors and Publisher of the *International Journal of Nanomedicine* have retracted the published article.

After publication, concerns were raised by a third party about the integrity of the data in Figure 4 and Figure 6 of the article.

Further investigation conducted by the Journal and Publisher confirmed unexpected overlapping areas in image panels representative of different treatment conditions present in Figure 4 and 6.

The authors have responded to the queries raised by the Journal and Publisher but have explained that the raw data for these experiments is unavailable, and as a result, these concerns cannot be addressed. As verifying the validity of published work is core to the integrity of the scholarly record, we are therefore retracting the article. The corresponding author listed in this publication has been informed.

We have been informed in our decision-making by our editorial policies and the COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as ‘Retracted’.

International Journal of Nanomedicine

Publish your work in this journal

The International Journal of Nanomedicine is an international, peer-reviewed journal focusing on the application of nanotechnology in diagnostics, therapeutics, and drug delivery systems throughout the biomedical field. This journal is indexed on PubMed Central, MedLine, CAS, SciSearch®, Current Contents®/Clinical Medicine, Journal Citation Reports/Science Edition, EMBase, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
