

A Circular RNA Derived from Golgi Glycoprotein I mRNA Regulates KRAS Expression and Promotes Colorectal Cancer Progression by Targeting microRNA-622 [Retraction]

Hao S, Qu R, Hu C, Wang M, Li Y. *Onco Targets Ther.* 2020;13:12637–12648. <https://doi.org/10.2147/OTT.S284032>

We, the Editors and Publisher of the journal *OncoTargets and Therapy*, have retracted the published article.

After publication, concerns have been raised by a third party about the integrity of the data in Figures 2 and 3 of the article.

Further investigation conducted by the Journal and Publisher confirmed duplicate image panels representative of different treatment conditions present in Figures 2 and 3.

When approached for an explanation, the authors have provided their raw data and the relevant documentation. However, further data integrity concerns have been identified in the raw data provided.

As verifying the validity of published work is core to the integrity of the scholarly record, we are therefore retracting the article. The corresponding author listed in this publication has been informed.

We have been informed in our decision-making by our editorial policies and the COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as ‘Retracted’.

OncoTargets and Therapy

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
