

## Neuropathic Pain Creates Systemic Ultrastructural Changes in the Nervous System Corrected by Electroacupuncture but Not by Pregabalin [Retraction]

Gao L, Zhang JF, Williams JP, et al. *J Pain Res.* 2021;14:2893—2905. <https://doi.org/10.2147/JPR.S322964>

We, the Editors and Publisher of the *Journal of Pain Research*, have retracted the published article.

After publication, concerns have been raised by a third party about the integrity of the data in Figures 3, 4, 5, 7, 8 and 9 of the article. Subsequently, the authors contacted the journal and requested the correction of their article.

Further investigation conducted by the Journal and Publisher confirmed significant integrity concerns, due to duplicate image panels representative of different samples and treatment conditions present in Figures 3, 4, 5, 7, 8 and 9.

When approached for further explanation, the authors did not respond to the additional queries raised by the Journal and Publisher.

As verifying the validity of published work is core to the integrity of the scholarly record, we are therefore retracting the article. The corresponding author listed in this publication has been informed.

We have been informed in our decision-making by our editorial policies and the COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as 'Retracted'.

### Journal of Pain Research

### Publish your work in this journal

The Journal of Pain Research is an international, peer reviewed, open access, online journal that welcomes laboratory and clinical findings in the fields of pain research and the prevention and management of pain. Original research, reviews, symposium reports, hypothesis formation and commentaries are all considered for publication. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
