

Nurse-Led Evidence-Based Practice to Promote Gastrointestinal Function Recovery in Women After Cesarean Delivery [Corrigendum]

Lin L, Chen P, Wan T, et al. *Int J Womens Health*. 2025;17:4399–4408. <https://doi.org/10.2147/IJWH.S551653>

There is an unintentional textual error in the Discussion section on page 4405 of the published paper, the authors have advised that the error occurred during the manuscript preparation process.

Page 4405, Discussion, first paragraph, the text “This study utilized the PDCA cycle and evidence-based practices¹⁸ to establish and implement a nurse-led, multidisciplinary collaborative evidence-based practice program for *Broussonetia papyrifera*, which significantly improved gastrointestinal function recovery in elective cesarean section patients” should read “This study utilized the PDCA cycle and evidence-based practices¹⁸ to establish and implement a nurse-led, multidisciplinary collaborative evidence-based practice program, which significantly improved gastrointestinal function recovery in elective cesarean section patients”.

The authors apologize for the error and wish to emphasize that this does not affect the study's design, data, results, or conclusions. The research exclusively involved evidence-based nursing and multidisciplinary clinical practices for postoperative recovery, with no connection to botany or any unrelated substances.

International Journal of Women's Health

Publish your work in this journal

The International Journal of Women's Health is an international, peer-reviewed open-access journal publishing original research, reports, editorials, reviews and commentaries on all aspects of women's healthcare including gynecology, obstetrics, and breast cancer. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
