

Cardiomyocyte Stim I Deficiency Exacerbates Doxorubicin Cardiotoxicity by Magnification of Endoplasmic Reticulum Stress [Retraction]

Zhu J, Zhang X, Xie H, Wang Y, Zhang X, Lin Z. *J Inflamm Res*. 2021;14: 3945–3958. <https://doi.org/10.2147/JIR.S304520>

We, the Editor and Publisher of *Journal of Inflammation Research* have retracted the published article.

After publication, concerns were raised by a third party in 2023 regarding the integrity of Figures 4 and 7 of the article.

Further investigation conducted by the Journal and Publisher identified significant integrity concerns in Figures 1, 4, 5, 6 and 7 of the article due to unexpected similarities with multiple previous publications from unrelated author groups.

When approached for an explanation, the authors did not respond to the queries raised by the Journal and Publisher. As verifying the validity of published work is core to the integrity of the scholarly record, we are therefore, retracting the article. The corresponding author has been informed.

We have been informed in our decision-making by our editorial policies and the COPE guidelines. The retracted articles will remain online to maintain the scholarly record, but they will be digitally watermarked on each page as ‘Retracted’.

Journal of Inflammation Research

Publish your work in this journal

The Journal of Inflammation Research is an international, peer-reviewed open-access journal that welcomes laboratory and clinical findings on the molecular basis, cell biology and pharmacology of inflammation including original research, reviews, symposium reports, hypothesis formation and commentaries on: acute/chronic inflammation; mediators of inflammation; cellular processes; molecular mechanisms; pharmacology and novel anti-inflammatory drugs; clinical conditions involving inflammation. The manuscript management system is completely online and includes a very quick and fair peer-review system. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
