

IncRNA WTI-AS Inhibits the Aggressiveness of Cervical Cancer Cell via Regulating p53 Expression via Sponging miR-330-5p [Retraction]

Cui L, Nai M, Zhang K, Li L, Li R. *Cancer Manag Res*, 2019;11:651—667. <https://doi.org/10.2147/CMAR.S176525>

We, the Editors and Publisher of the journal *Cancer Management and Research*, have retracted the published article.

After publication, concerns have been raised by a third party in 2024 about the integrity of the data in Figure 1 of the article.

Further investigation conducted by the Journal and Publisher confirmed the following:

- Unexpected similarities between Figure 1 and a previously published article by an unrelated author group: Yu DP, Zhou Y. Astrocyte Elevated Gene 1 (AEG-1) Acts as a Promoter Gene in Clear Cell Renal Cell Carcinoma Cell Growth and Metastasis. *Med Sci Monit*. 2018;24:8213-8223. doi:[10.12659/MSM.911010](https://doi.org/10.12659/MSM.911010)
- Unexpected similarities between the images shown in Figure 1 that are representative of different samples.
- Unexpected similarities between the cell staining images in Figure 1B and Figure 4I that are representative of different samples and treatment conditions.

When approached for an explanation, the authors did not respond to the queries raised by the Journal and Publisher.

As verifying the validity of published work is core to the integrity of the scholarly record, we are therefore retracting the article. The corresponding author listed in this publication has been informed.

We have been informed in our decision-making by our editorial policies and the COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as 'Retracted'.

Cancer Management and Research

Publish your work in this journal

Cancer Management and Research is an international, peer-reviewed open access journal focusing on cancer research and the optimal use of preventative and integrated treatment interventions to achieve improved outcomes, enhanced survival and quality of life for the cancer patient. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
