

PLK1 Contributes to Autophagy by Regulating MYC Stabilization in Osteosarcoma Cells [Retraction]

Mo H, He J, Yuan Z, et al. *Onco Targets Ther.* 2019;12:7527–7536. <https://doi.org/10.2147/OTT.S210575>

We, the Editors and Publisher of the journal *OncoTargets and Therapy*, have retracted the published article.

After publication, concerns have been raised by a third party in 2023 about the integrity of the data in Figures 1 and 3 of the article.

Further investigation conducted by the Journal and Publisher confirmed unexpected similarities between the fluorescence microscopy image panels representative of different treatment conditions in Figures 1G and 3D. Upon further review, the Journal and Publisher identified additional integrity concerns present in the Western blot data shown in Figures 2, 3 and 4.

When approached for an explanation, the authors have responded but due to the time that has elapsed since the experiments were conducted, the authors confirmed that the raw data are unavailable. As a result, these concerns cannot be addressed. The authors have agreed to the retraction of this article and apologize for this oversight.

We have been informed in our decision-making by our editorial policies and the COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as ‘Retracted’.

OncoTargets and Therapy

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
