

MiR-153-3p Suppresses Cell Proliferation, Invasion and Glycolysis of Thyroid Cancer Through Inhibiting E3F3 Expression [Retraction]

Deng X, Guo B, Fan Y. *Onco Targets Ther.* 2021;14:519—529. <https://doi.org/10.2147/OTT.S267887>

We, the Editors and Publisher of the journal *OncoTargets and Therapy*, have retracted the published article.

After publication, concerns have been raised by a third party in 2023 about the integrity of the data in Figure 5 of the article.

Further investigation conducted by the Journal and Publisher confirmed the following:

- Unexpected similarities between the flow cytometry data shown in Figure 2C and Figure 4D.
- Unexpected similarities between the cell migration and invasion images shown in Figure 4E.
- Unexpected similarities between the immunohistochemistry staining images in Figure 5D and the following previously published article from an unrelated author group:
Wu J, Wang X, Yuan X, et al. Kinesin family member C1 increases temozolomide resistance of glioblastoma through promoting DNA damage repair. *Cell Transplantation.* 2021;30. doi: [10.1177/0963689721991466](https://doi.org/10.1177/0963689721991466)

When approached for an explanation, the authors did not respond to the queries raised by the Journal and Publisher.

As verifying the validity of published work is core to the integrity of the scholarly record, we are therefore retracting the article. The corresponding author listed in this publication has been informed.

We have been informed in our decision-making by our editorial policies and the COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as 'Retracted'.

OncoTargets and Therapy

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
