

RAP80 Expression in Breast Cancer and Its Relationship with Apoptosis in Breast Cancer Cells [Retraction]

Jin G, Mao X, Qiao Z, Chen B, Jin F. *Onco Targets Ther.* 2019;12:625–634. <https://doi.org/10.2147/OTT.S186981>

We, the Editors and Publisher of the journal *OncoTargets and Therapy*, have retracted the published article.

After publication, concerns have been raised by a third party in 2026 about the integrity of the data in Figure 5 of the article. Subsequently, the authors contacted the Journal requesting the correction of their article.

Further investigation conducted by the Journal and Publisher confirmed the following:

- Unexpected similarities present between Transwell assay images in Figure 5B that are representative of different samples and treatment conditions.
- Unexpected similarities within the Transwell assay image shown in Figure 5F.

Upon further review, the Journal and Publisher identified additional integrity concerns present in the Western blot data shown in the article.

When approached for an explanation, the authors have provided their raw data and the relevant documentation. However, further data integrity concerns have been identified in the raw data provided. As the editorial team no longer have confidence in the reported conclusions, we are retracting the article.

The corresponding author listed in this publication has been informed.

We have been informed in our decision-making by our editorial policies and the COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as ‘Retracted’.
