

MicroRNA-125a-5p Modulates Human Cervical Carcinoma Proliferation and Migration by Targeting ABL2 [Retraction]

Qin X, Wan Y, Wang S, Xue M. *Drug Des Devel Ther.* 2016;10:71—79. <https://doi.org/10.2147/DDDT.S93104>

We, the Editors and Publisher of the journal *Drug Design, Development and Therapy*, have retracted the published article.

After publication, concerns have been raised by a third party in 2024 about the integrity of the data in Figure 3 of the article.

Further investigation conducted by the Journal and Publisher confirmed the following:

- Unexpected similarities within the individual figure panels in Figures 2D, 2E, 3B, 5D, and 5E.
- Unusual similarities between the image panels in Figures 2D and 2E.

When approached for an explanation, the authors did not respond to the queries raised by the Journal and Publisher.

As verifying the validity of published work is core to the integrity of the scholarly record, we are therefore retracting the article. The corresponding author listed in this publication has been informed.

We have been informed in our decision-making by our editorial policies and the COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as 'Retracted'.

Drug Design, Development and Therapy

Publish your work in this journal

Drug Design, Development and Therapy is an international, peer-reviewed open-access journal that spans the spectrum of drug design and development through to clinical applications. Clinical outcomes, patient safety, and programs for the development and effective, safe, and sustained use of medicines are a feature of the journal, which has also been accepted for indexing on PubMed Central. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
