

**Aceclofenac Nanocrystals with Enhanced in vitro, in vivo Performance: Formulation Optimization, Characterization, Analgesic and Acute Toxicity Studies [Expression of Concern]**

Rahim H, Sadiq A, Khan S, et al. *Drug Des Devel Ther.* 2017;11:2443–2452. <https://doi.org/10.2147/DDDT.S140626>

We, the Publisher and Editor of *Drug Design, Development and Therapy*, are issuing an Expression of Concern for the published article.

Following publication, concerns were raised by a third party about the integrity of images in Figure 3 of the article. As part of the investigation, the authors were asked for any information that would help to confirm the validity of the images.

The authors have responded to the queries raised, but due to the time that has elapsed since the experiments were conducted, the raw data for this figure is unavailable.

Therefore, we are unable to address the concerns regarding Figure 3; however, the Editor confirms that the concerns raised do not affect the overall validity or integrity of the reported findings. We advise readers to interpret the information presented in Figure 3 with due caution.

The authors have been notified about this Expression of Concern. Should further information come to light, the journal will reassess any concern raised.

Drug Design, Development and Therapy

Publish your work in this journal

Drug Design, Development and Therapy is an international, peer-reviewed open-access journal that spans the spectrum of drug design and development through to clinical applications. Clinical outcomes, patient safety, and programs for the development and effective, safe, and sustained use of medicines are a feature of the journal, which has also been accepted for indexing on PubMed Central. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
