

The Relationship Between Morning Symptoms and the Risk of Future Exacerbations in COPD [Corrigendum]

Sun T, Li X, Cheng W, et al. *Int J Chron Obstruct Pulmon Dis*. 2020;15:1899–1907.

The authors have advised that there are errors in [Table 3](#) on page 1905. The correct table is shown below.

Table 3 The Relationship Between Morning Symptoms and the Exacerbations of the One-Year Follow-Up Period

	All Patients (N = 78)	Morning Symptoms Score < 30.0 (N = 39)	Morning Symptoms Score ≥ 30.0 (N = 39)	P-value
Exacerbations during follow-up, n (%)				
No exacerbation	46 (59.0)	27 (69.2)	19 (48.7)	0.066
Moderate exacerbations	22 (28.2)	11 (28.2)	11 (28.2)	1.000
Severe exacerbations	17 (21.8)	3 (7.7)	14 (35.9)	0.003
Frequent exacerbations	17 (21.8)	6 (15.4)	11 (28.2)	0.170
Exacerbations during follow-up, median [IQR]				
Total exacerbations	0 (0,1)	0 (0,1)	1 (0,2)	0.078
Moderate exacerbations	0 (0,1)	0 (0,1)	0 (0,1)	0.950
Severe exacerbations	0 (0,0)	0 (0,0)	0 (0,1)	0.002

Notes: Data are presented as the median (IQR), or number (%). Data were compared between two groups using Mann–Whitney U-test, and χ^2 test.

Abbreviations: SD, standard deviation; IQR, interquartile range.

Publish your work in this journal

The International Journal of COPD is an international, peer-reviewed journal of therapeutics and pharmacology focusing on concise rapid reporting of clinical studies and reviews in COPD. Special focus is given to the pathophysiological processes underlying the disease, intervention programs, patient focused education, and self management

protocols. This journal is indexed on PubMed Central, MedLine and CAS. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
