

Association Between the Diabetic Foot Ulcer and the Bacterial Colony of the Skin Based on 16S rRNA Gene Sequencing: An Observational Study [Corrigendum]

Zhang XN, Wu CY, Wu ZW, Xu LX, Jiang FT, Chen HW. *Clin Cosmet Investig Dermatol*. 2023;16:2801–2812.

Page 2804, α Diversity Analysis section, second sentence, the text “As for the Shannon index, the TW group showed significantly lower than the H group, and the T group showed higher than the H and TW groups (Figure 4B)” should read “As for the Shannon index, the TW and T groups showed significantly lower than the H group (Figure 4B)”.

The authors apologize for this oversight.

Publish your work in this journal

Clinical, Cosmetic and Investigational Dermatology is an international, peer-reviewed, open access, online journal that focuses on the latest clinical and experimental research in all aspects of skin disease and cosmetic interventions. This journal is indexed on CAS. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
