Icariin Mitigates the Growth and Invasion Ability of Human Oral Squamous Cell Carcinoma via Inhibiting Toll-Like Receptor 4 and Phosphorylation of NF-κB P65 [Retraction]

At the authors request, we, the Editor and Publisher of the journal *OncoTargets and Therapy* have retracted the published article.

Following publication of the article, the authors raised concerns about the duplication of images from Figures 2, 3, 4 and 5 with images from unrelated articles. Specifically,

- The image for Figure 3A, SCC-15, Control, has been duplicated with the image for Figure 6A, Control from Zhang K-q, Chu X-d. GANT61 plays antitumor effects by inducing oxidative stress through miRNA-1286/RAB31 axis in osteosarcoma. *Cell Biol Int*. 2021;45:61–73. https://doi.org/10.1002/cbin.11467.

- The image for Figure 4C, p65 fluorescence, SCC-15, ICA (5 µM), has been duplicated with the image for Figure 7J, Hep3B, sg-NC from Pu J, Huang Y, Fang Q, et al. Hypoxia-induced Fascin-1 upregulation is regulated by Akt/Rac1 axis and enhances malignant properties of liver cancer cells via mediating actin cytoskeleton rearrangement and Hippo/YAP activation. *Cell Death Discov*. 2021;7:385. https://doi.org/10.1038/s41420-021-00778-5.

- The image for Figure 5B, Ki67, Control, has been duplicated with the image for Figure 6D, CD44, Control for Li N, Cheng C, Wang T. MiR-181c-5p Mitigates Tumorigenesis in Cervical Squamous Cell Carcinoma via Targeting Glycogen Synthase Kinase 3β Interaction Protein (GSKIP). *Onco Targets Ther*. 2020;13:4495–4505. https://doi.org/10.2147/OTT.S245254.

The authors were cooperative and responded to our queries but were unable to provide a satisfactory explanation for how the images came to be duplicated or provide satisfactory original data for the study. As verifying the validity of published work is core to the integrity of the scholarly record, the authors requested to retract the article and the Publisher and Editor agreed with this decision.
We have been informed in our decision-making by our editorial policies and COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

OncoTargets and Therapy

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
