RETRACTION

Protective Effects of Chlorogenic Acid on Cerebral Ischemia/Reperfusion Injury Rats by Regulating Oxidative Stress-Related Nrf2 Pathway [Retraction]

At the authors request, we, the Editor and Publisher of the journal Drug Design, Development and Therapy have retracted the published article.

Following publication of the article, the authors raised concerns about the duplication of images from Figures 4 and 5 with images from an unrelated article. Specifically,

- The images for Figure 4A, TUNEL, CI/R, 100, and Figure 5C, TUNEL, CI/R+ML385, have been duplicated with the images for Figure 2A, TUNEL, Eriocitrin, 16 and I/R, respectively, from He J, Zhou D, Yan B. Eriocitrin alleviates oxidative stress and inflammatory response in cerebral ischemia reperfusion rats by regulating phosphorylation levels of Nrf2/NQO-1/HO-1/NF-xB p65 proteins. Ann Transl Med. 2020;8(12):757. https://doi.org/10.21037/atm-20-4258.
- In addition, the images for Figure 4A, TUNEL, CI/R, - and 20, have been duplicated.

The authors were cooperative and responded to our queries but were unable to provide a satisfactory explanation for how the images came to be duplicated or provide satisfactory original data for the study. As verifying the validity of published work is core to the integrity of the scholarly record, the authors requested to retract the article and the Publisher and Editor agreed with this decision.

We have been informed in our decision-making by our editorial policies and COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Drug Design, Development and Therapy

Publish your work in this journal

Drug Design, Development and Therapy is an international, peer-reviewed open-access journal that spans the spectrum of drug design and development through to clinical applications. Clinical outcomes, patient safety, and programs for the development and effective, safe, and sustained use of medicines are a feature of the journal, which has also been accepted for indexing on PubMed Central. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
