

Investigation of Wound Healing and Anti-Inflammatory Activities of Solvent Fractions of 80% Methanol Leaf Extract of *Achyranthes Aspera* L. (Amaranthaceae) in Rats [Retraction]

Mengie T, Mequanente S, Nigussie D, Legesse B, Makonnen E. *J Inflamm Res*. 2021;14:1775—1787.

We, the Editors and Publisher of the *Journal of Inflammation Research*, have retracted the following article.

Since publication, concerns have been raised about the integrity of the data in the article, specifically image duplication in Figure 2. When approached for an explanation, the authors have been unable to provide their original data or the relevant supporting documentation. As verifying the validity of published work is core to the integrity of the scholarly record, we are therefore retracting the article. The corresponding author listed in this publication has been informed. The authors do not agree with the retraction.

We have been informed in our decision-making by our editorial policies and the COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as 'Retracted'.

Publish your work in this journal

The Journal of Inflammation Research is an international, peer-reviewed open-access journal that welcomes laboratory and clinical findings on the molecular basis, cell biology and pharmacology of inflammation including original research, reviews, symposium reports, hypothesis formation and commentaries on: acute/chronic inflammation; mediators of inflammation; cellular processes; molecular mechanisms; pharmacology and novel anti-inflammatory drugs; clinical conditions involving inflammation. The manuscript management system is completely online and includes a very quick and fair peer-review system. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
