

Supplementary Material

Title: Supplementary Dataset S1: Raw Clinical Data for the Manuscript "The Predictive Value of Initial Trough Concentration of Voriconazole and Procalcitonin in Hepatotoxic Adverse Events"

Description: This archive contains the original clinical data as a Microsoft Excel Workbook (.xlsx).

Sheet "Raw Clinical Data": Clinical records of 170 patients receiving voriconazole treatment, including demographic information, laboratory values (voriconazole trough concentrations and procalcitonin levels), and the incidence of hepatotoxic adverse events.
