* Only associations meeting the criteria of P < 0.05, P-HEIDI > 0.01, and passing sensitivity analysis are presented

PCD, programmed cell death; SMR, Summary data-level Mendelian randomization; FEV, forced vital capacity; FEV1, forced expiratory volume in 1 second; PEF, peak expiratory flow; CI, confidence interval; FDR, false dicovery rate; HEIDI, heterogeneity in dependent instruments; SNP, single nucleotide polymorphsim

Table S34. Sensitivity analysis of associations between PCD-related gene expression and lung function parameters*

* Only associations meeting the criteria of P < 0.05, P-HEIDI > 0.01, and passing sensitivity analysis are presented

PCD, programmed cell death; FEV, forced vital capacity; FEV1, forced expiratory volume in 1 second; PEF, peak expiratory flow; SNP, single nucleotide polymorphsim; CI, confidence interval;

Table S35. Genetic instruments for sensitivity analysis of PCD-related gene expression in relation to lung function parameters

* Only associations meeting the criteria of FDR < 0.05, P-HEIDI > 0.01, and passing sensitivity analysis are presented

PCD, programmed cell death; SNP, single nucleotide polymorphsim; FEV, forced vital capacity; FEV1, forced expiratory volume in 1 second; PEF, peak expiratory flow; PP, posterior probability

Table S40. Colocalization analysis of associations between PCD-related gene expression and lung function parameters*
