* Only associations meeting the criteria of P < 0.05, P-HEIDI > 0.01, and passing sensitivity analysis are presented

PCD, programmed cell death; COPD, chronic obstructive pulmonary disease; SNP, single nucleotide polymorphsim; OR odds ratio; CI, confidence interval

Table S22. Sensitivity analysis of associations between PCD-related gene expression and COPD*

* Only associations meeting the criteria of P < 0.05, P-HEIDI > 0.01, and passing sensitivity analysis are presented

PCD, programmed cell death; SMR, Summary data-level Mendelian randomization; FEV, forced vital capacity; FEV1, forced expiratory volume in 1 second; PEF, peak expiratory flow; CI, confidence interval; FDR, false dicovery rate; HEIDI, heterogeneity in dependent instruments; SNP, single nucleotide polymorphsim

Table S31. Sensitivity analysis of associations between PCD-related gene methylation and lung function parameters*
