Supplementary Material

Supplementary Figures

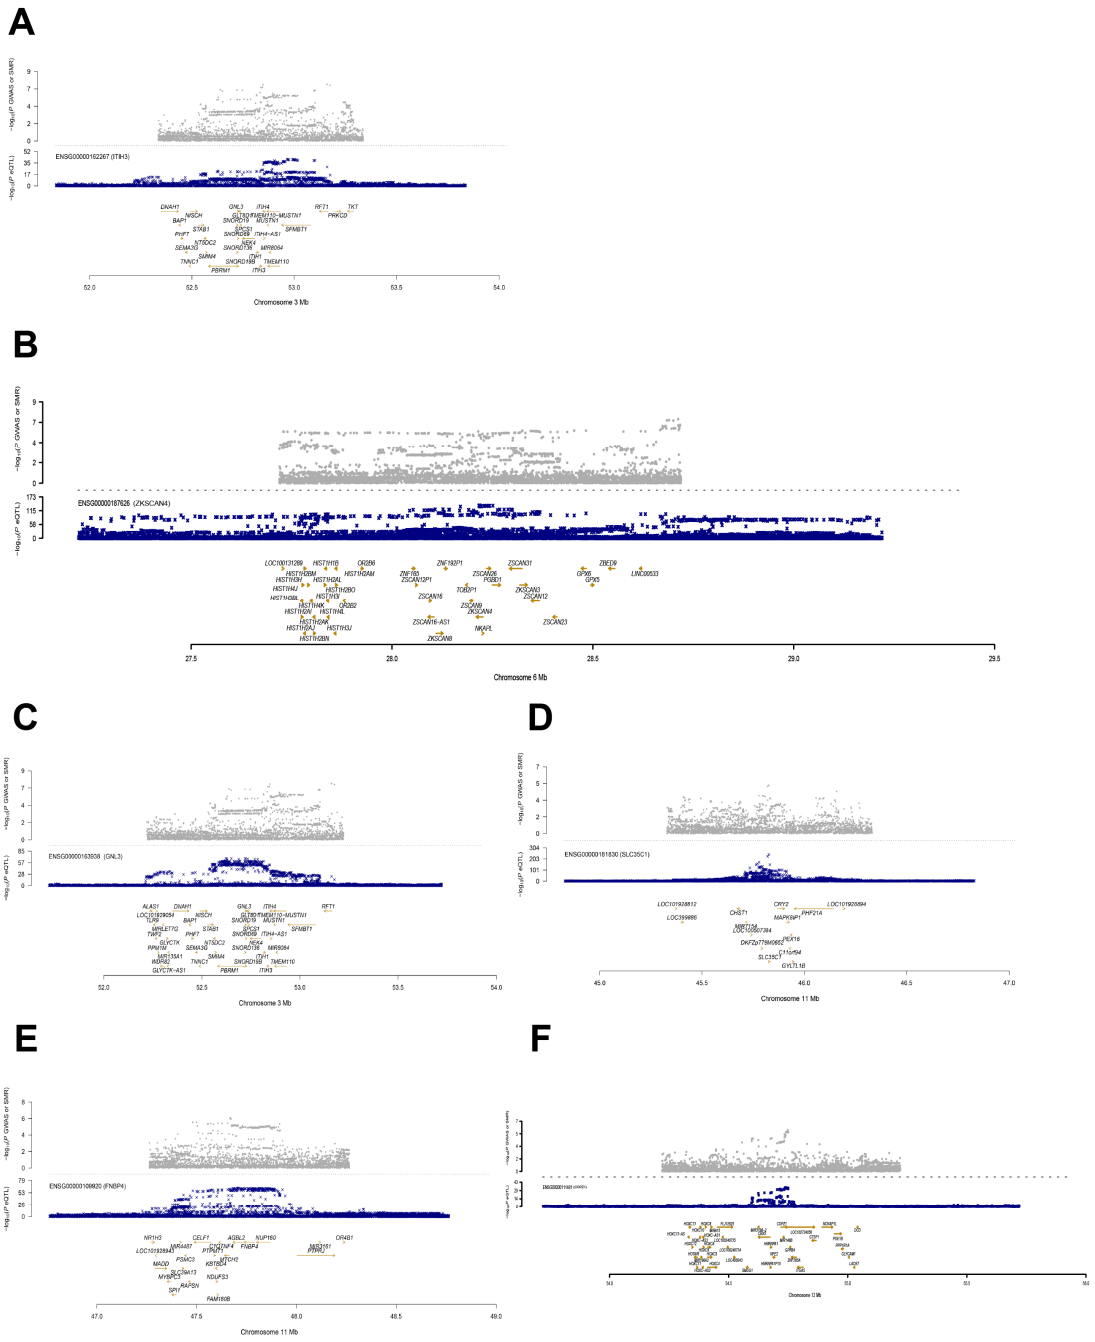

Fig S1. The SMR results at gene loci for anxiety disorders. (A) ITIH3; (B) ZKSCAN4; (C) GNL3; (D) SLC35C1; (E) FNBP4; (F) COPZ1. The top gray dots represent the -log10(p-values) of SNP from GWAS. The middle blue dots indicate the -log10(p-values) of the genes from eQTL, and the bottom section displays the positions of the probes relative to the genes.

Note: The top panel of each subplot shows the $-\log_{10}$(P-value) of SNPs in the region from the anxiety disorder GWAS (y-axis) plotted against their chromosomal position (x-axis). The bottom panel displays the gene annotations in the region. Yellow arrow: the direction of transcription for the lead gene. The genomic positions of neighboring genes, with gene names indicated above.

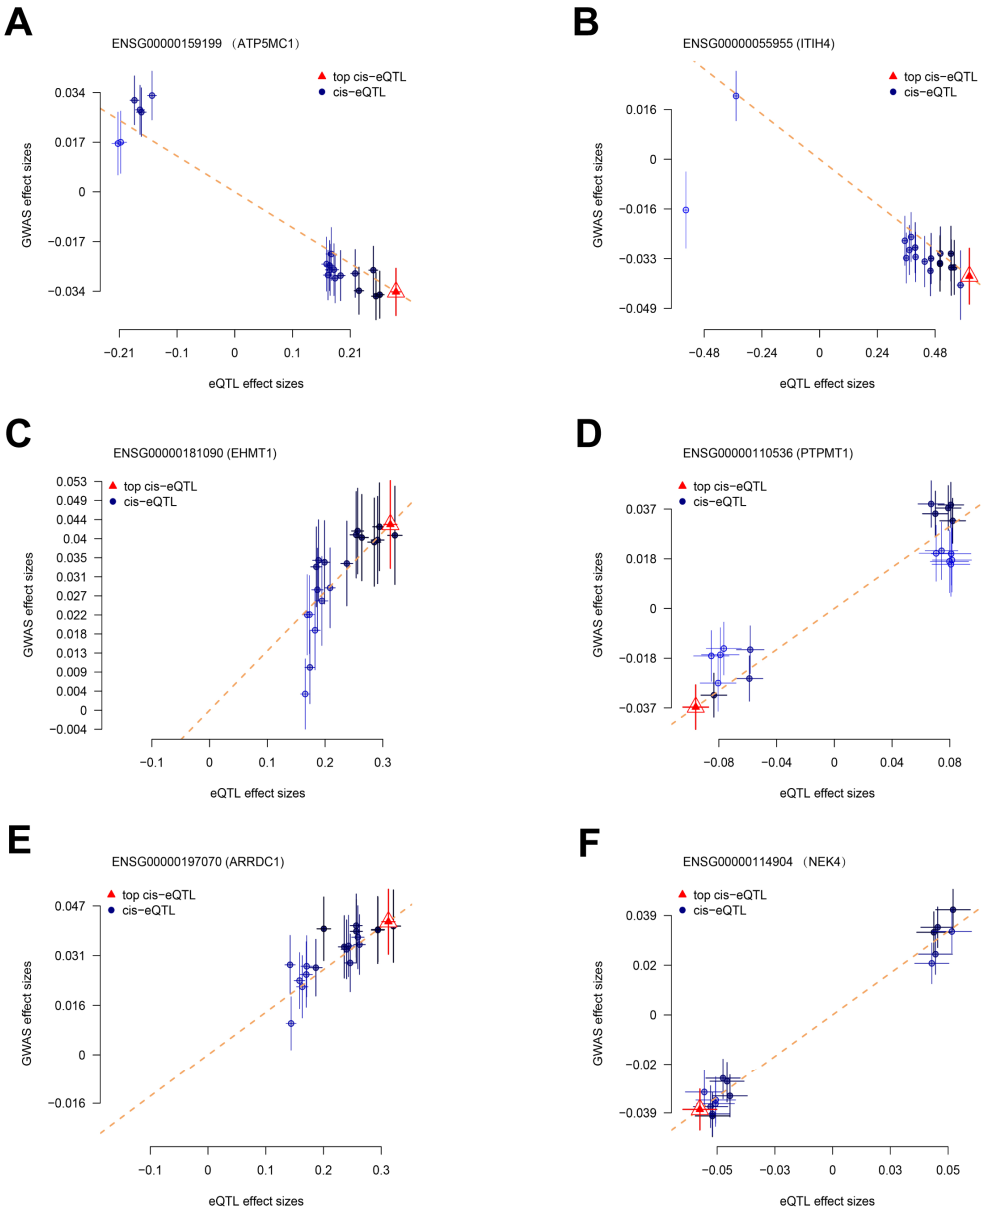

Fig S2. Scatterplot of the association results between additional six genes in eQTL and anxiety disorder. (A) ATP5MC1; (B) ITIH4; (C) EHMT1; (D) PTPMT1; (E) ARRDC1; (F) NEK4.

Note: The horizontal axis represents the effect sizes of single nucleotide polymorphisms (SNPs)

within the eQTL genes, while the vertical axis displays the effect sizes of SNPs associated with anxiety disorders. Each blue circle with cross symbol denotes a SNP, and the red triangles signify the most significant SNPs. Yellow dashed yellow lines illustrate the regression line, which indicates the directionality of the association between the effect sizes of eQTL and those of genome-wide association studies (GWAS). Ascending segments from left to right reveal a positive correlation, suggesting that increased gene expression is associated with a heightened risk of anxiety disorders. In contrast, descending segments indicate a negative correlation, where elevated gene expression correlates with a diminished risk of anxiety disorders

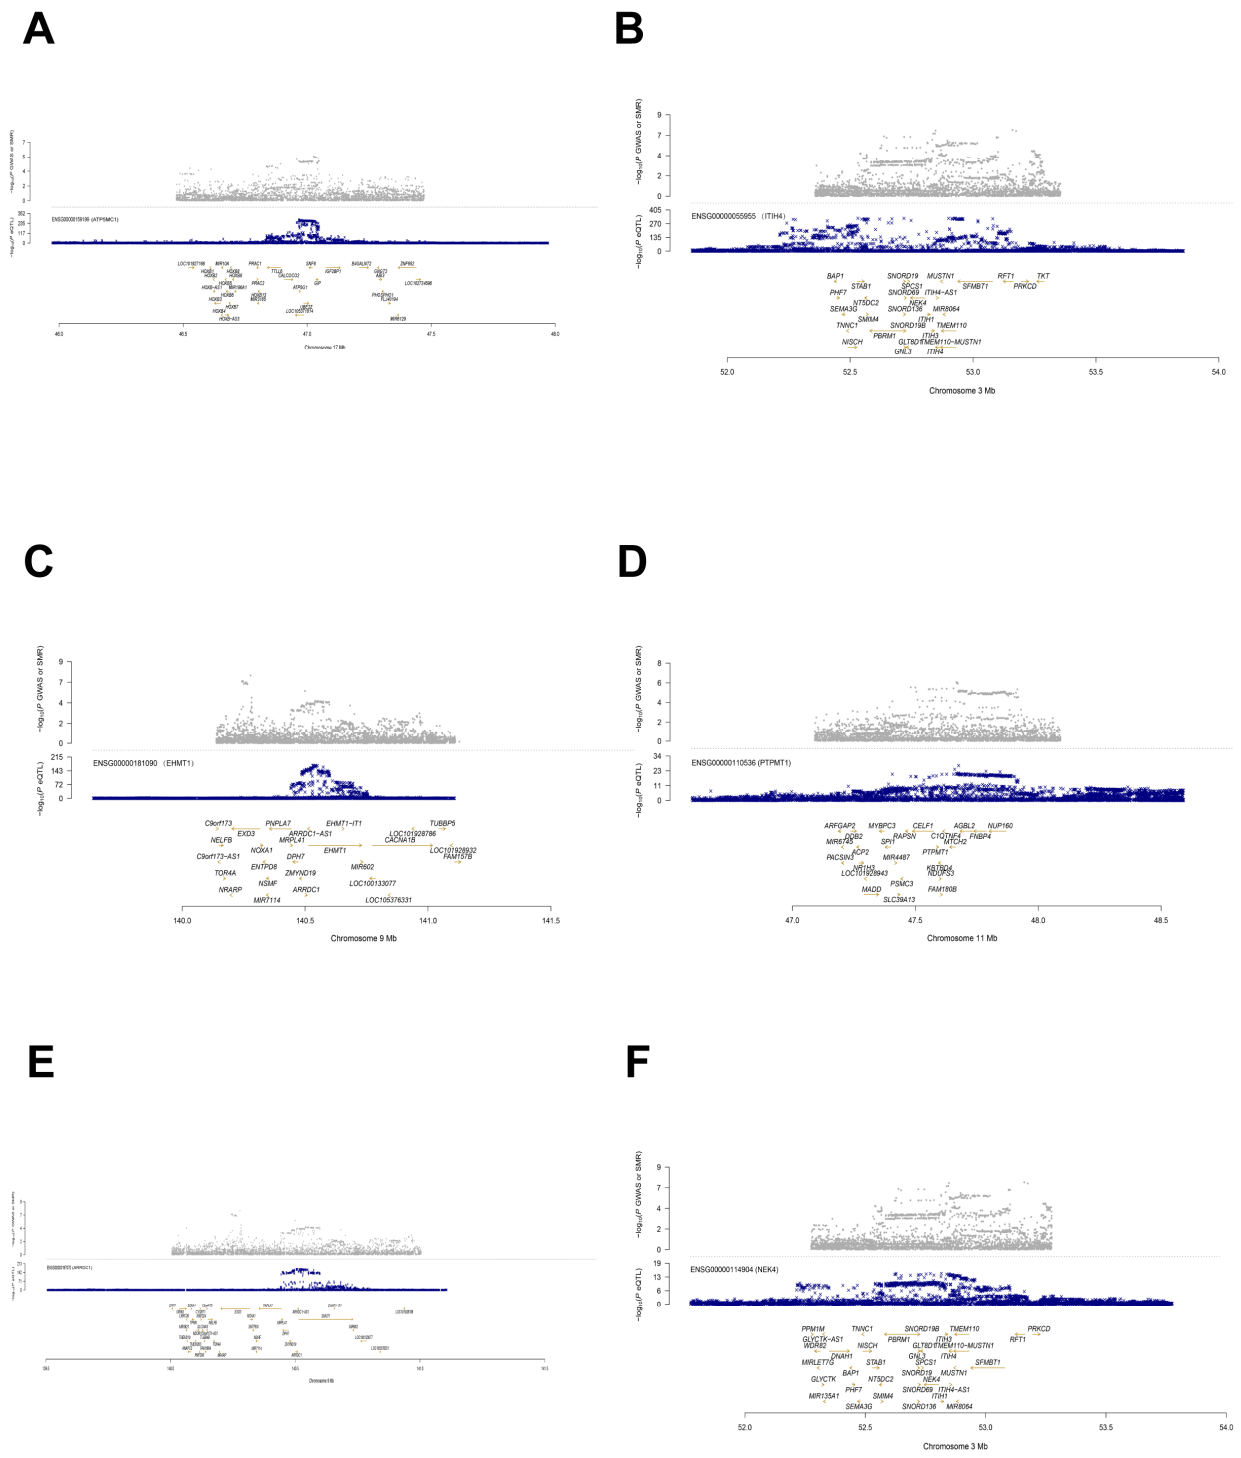

Fig S3. The SMR results at gene loci for anxiety disorders. (A) ATP5MC1; (B) ITIH4; (C) EHMT1; (D) PTPMT1; (E) ARRDC1; (F) NEK4.

Note: The top panel of each subplot shows the $-\log_{10}$(P-value) of SNPs in the region from the anxiety disorder GWAS (y-axis) plotted against their chromosomal position (x-axis). The bottom panel displays the gene annotations in the region. Yellow arrow: the direction of transcription for the lead

gene. The genomic positions of neighboring genes, with gene names indicated above.

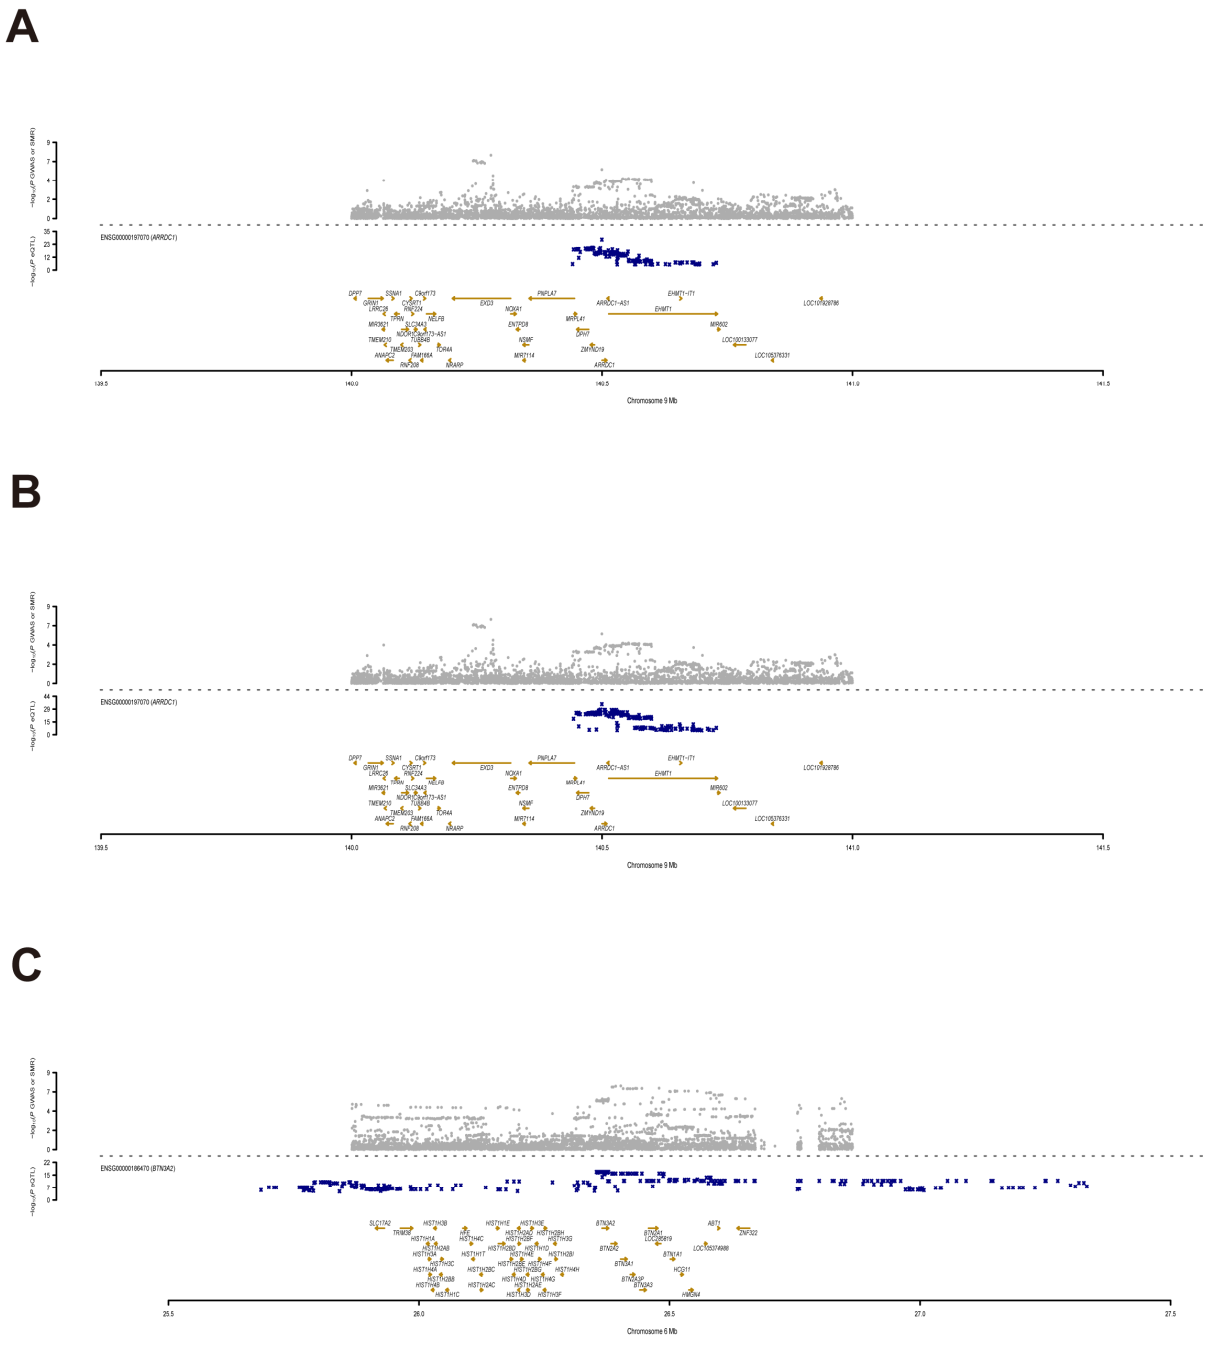

Fig S4. The SMR results at gene loci for anxiety disorders from eQTL brain regions. (A) ARRDC1 in cerebellar hemisphere; (B) ARRDC1 in cerebellum; (C) BTN3A2 in spinal cord cervical.

Note: The top panel of each subplot shows the $-\log_{10}$(P-value) of SNPs in the region from the anxiety disorder GWAS (y-axis) plotted against their chromosomal position (x-axis). The bottom panel displays the gene annotations in the region. Yellow arrow: the direction of transcription for the lead gene. The genomic positions of neighboring genes, with gene names indicated above.

Supplementary Tables

Table S1. The total results of SMR analysis and sensitivity analysis for anxiety susceptibility in eQTLGen dataset
