

Comparison of the Effects of Sufentanil and Fentanyl on Postoperative Sleep Quality of Children Undergoing Tonsillectomy and Adenotomy: A Randomized Controlled Trial [Corrigendum]

Li Y, Song B, Li Z, et al. *Nat Sci Sleep*. 2021;13:821–828. “duration of the operation (min) ($P = 0.062$)” should read “duration of surgery (min) ($P = 0.517$)”.

On page 823, Results, The Comparison of Demographic Characteristics of the Two Groups section, line 3, the text **Table 1** on page 824, the Duration of surgery (min) row is incorrect. The correct **Table 1** is as follows.

Table 1 Comparison of demographic characteristics between the two groups

	Group S (n=34)	Group F (n=36)	P
Age (years)	6.94±2.7	7.03±2.5	0.888
Gender (Male/Female) (n)	14/20	17/19	0.611
Weight (Kg)	22.59±5.5	24.11±4.4	0.205
Height (cm)	118.76±15.6	120.11±16.0	0.722
Duration of surgery (min)	53.47±22.5	50.03±21.7	0.517
Total does of remifentanyl (mg)	0.32±0.2	0.41±0.1	0.005

Note: Variables are presented as mean (\pm SD) or as frequency (percentage).

Publish your work in this journal

Nature and Science of Sleep is an international, peer-reviewed, open access journal covering all aspects of sleep science and sleep medicine, including the neurophysiology and functions of sleep, the genetics of sleep, sleep and society, biological rhythms, dreaming, sleep disorders and therapy, and strategies to optimize healthy sleep.

The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
