

Subject Ability to Use System Scale – Healthcare Professional Version

On a scale from 1 to 100 (see descriptors below), was the subject able to successfully change the patch and pair with application on the smartphone independently? SCORE (1-100)

Range of Assistance Needed and Level of Understanding	Score	Descriptor
Complete, no understanding	1-10	Not able to change or pair the patch without significant help and does not appear to understand process
Complete, some understanding	11-20	Not able to either change patch or pair patch with app correctly without significant help on all aspects, but appears to somewhat understand process
Complete, with moderate understanding	21-30	Appears to understand most of process and was able to begin approximating correct patch placement or pairing, but still required significant help with both aspects
Nearly Complete, with moderate understanding	31-40	Required significant assistance in understanding order of processes or required step by step direct guidance, <u>but was able to do some aspects by themselves</u> . Reports and shows some understanding process
Moderate, reasonable understanding	41-50	Was able to either properly place patch on own, or pair patch, <u>but not both without at least moderate guidance for both processes</u> . Understands process
Moderate, reasonable understanding	51-60	Was able to place or pair patch with minimal assistance on one of these aspects, but more extensive (moderate help) on one of the elements. Understands process
Moderate, good understanding	61-70	Was able to either properly place patch on own, but required moderate help with pairing, or required moderate help in placing patch but could pair on their own successfully. Understands process
Minimal, good understanding	71-80	Needed only minimal assistance with <u>both</u> patch and pairing process. Understands process
Minimal, good understanding	81-90	Needed only minimal assistance with <u>either</u> patch or pairing process, but not both processes (ie, could complete one aspect independently). Understands process
None – Independent; full understanding	91-100	Was able to place patch successfully and pair with application independently and with understanding of process

Comments (briefly describe areas of patch placement or pairing that required assistance – if any): _____
