${\bf S1.}$ Questionnaire results on adherence in asthma control for trained and untrained participants

	Total	Untrained	Trained	
Variable	(n=360)	(n=180)	(n=180)	p value
Importance of treatment adherence compa	ared to the othe	r characteristic	s of asthma mai	nagement
Most important, yes	334 (92.8%)	162 (90.0%)	172 (95.6%)	0.1219
Importance attached to the characteristics	s of asthma man	nagement (most	important)	
Correct diagnosis, yes	170 (47.2%)	94 (52.2%)	76 (42.2%)	0.1280
Effective therapeutic alternatives, yes	129 (35.8%)	57 (31.7%)	72 (40.0%)	0.1320
Easy device handling, yes	130 (36.1%)	61 (33.9%)	69 (38.3%)	0.5677
Treatment adherence, yes	142 (39.4%)	75 (41.7%)	67 (37.2%)	0.6346
Adequate patient follow-up, yes	149 (41.4%)	73 (40.6%)	76 (42.2%)	0.7282
Frequency in assessing adherence	•	•	<u> </u>	
Never	4 (1.1%)	0 (0.0%)	4 (2.2%)	
Sometimes	48 (13.3%)	23 (12.8%)	25 (13.9%)	0.1667
Frequently	163 (45.3%)	79 (43.9%)	84 (46.7%)	0.1667
Always	145 (40.3%)	78 (43.3%)	67 (37.2%)	
Type of patients assessed				
All patients	261 (72.5%)	138 (76.7%)	123 (68.3%)	0.0766
Severe patients	46 (12.8%)	20 (11.1%)	26 (14.4%)	0.3435
Non-compliance	82 (22.8%)	37 (20.6%)	45 (25.0%)	0.3147
Instruments used to assess adherence				
Ask the patient (and/or caregiver) directly,	315 (87.5%)	161 (89.4%)	154 (85.6%)	0.2646
yes	313 (67.570)	101 (07.470)	134 (03.070)	0.2040
Morisky Green Test, yes	46 (12.5%)	21 (11.7%)	25 (13.9%)	0.5277
TAI questionnaire, yes	41 (11.4%)	19 (10.6%)	22 (12.2%)	0.6187
MARS-A Test, yes	5 (1.4%)	3 (1.7%)	2 (1.1%)	0.6525
AEPQ Test, yes	3 (0.8%)	1 (0.6%)	2 (1.1%)	0.5621
Haynes-Sackett Test, yes	7 (1.9%)	2 (1.1%)	5 (2.8%)	0.2522
Use clinical response, for example FeNO, yes	116 (32.2%)	53 (29.4%)	63 (35.0%)	0.2594
Control of therapeutic effect, yes	230 (63.9%)	121 (67.2%)	109 (60.6%)	0.1879
I check planned prescriptions dispensed,	144 (40.0%)	80 (44.4%)	64 (35.6%)	0.0852
yes None of the above, yes	2 (0.6%)	0 (0.0%)	2 (1.1%)	0.1561
Interventions to promote adherence		•		
Simplify the treatment as far as possible,	286 (79.4%)	147 (81.7%)	139 (77.2%)	0.2968
Involve the patient in the therapeutic plan,	284 (78.9%)	143 (79.4%)	141 (78.3%)	0.7962
yes Give written information to the patient, yes	255 (70.8%)	125 (69.4%)	130 (72.2%)	0.5621
Involvement of family/patient	184 (51.1%)	96 (53.3%)	88 (48.9%)	0.3990
environment, yes	104 (31.1%)	90 (33.3%)	00 (40.3%)	U.J77U
Use reminder methods, yes	52 (14.4%)	28 (15.6%)	24 (13.3%)	0.5487
I call the patient if she/he did not turn up	25 (6.9%)	13 (7.2%)	12 (6.7%)	0.8358
for the follow-up, yes

C: Chi-square test; statistically significant *p < 0.05, **p < 0.01, ***p < 0.001

Trained in AdhE: previous training in adherence (distance learning courses, printed material, videos, images, social media, among others)

Training in MI: Training in motivational interview: 2.30-hour-long training sessions for medical professionals including: asthma adherence evidenced based video support. The training MI was conducted by a psychiatrist specialised in the type of technique.
