

Supplementary Figure 1. qRT-PCR analysis of SNHG16 levels in RB50 and Y79 cells. RB50 and Y79 cells were transfected si-SNHG16 or si-NC and relative SNHG16 expression was assessed using qRT-PCR. ** $p < 0.01$ compared with the control group.

Supplementary Figure 2. miR-182-5p and miR-128-3p levels was validated using qRT-PCR. RB50 and Y79 cells were transfected miR-182-5p mimics, miR-128-3p mimics or miRNA negative and relative miRNA expression was determined using qRT-PCR. ** $p < 0.01$ compared with the control group.
