

## Supplemental Figure Legend

**Figure S1. Smad4 and its variants successfully recombinant expressed in A549 cells.** **A**, Representative images show Smad4 and its variants recombinant express in A549 cells in mRNA level as indicated. **B**, Representative images to show the Smad4 recombinant express in A549 cells in protein level as indicated. **C&D**, Bar graphs show the intensity-based quantification of Smad4 and its variants expression in A549 cells in mRNA level as indicated in panel A (C) and protein level protein level as indicated in panel B (D). n=3, Error bars: Mean±SD. \*P<0.05, \*\*\*P<0.005.
