

**Supplemental Table 1. Spearman’s correlation between choroid parameter and length of illness, antipsychotic treatment.**

<b>Correlation</b>	<b>R-value</b>	<b>p-value</b>
Maximum CT ( $\mu\text{m}$ ) and Duration of Illness (months)	-0.06	.65
Maximum CT ( $\mu\text{m}$ ) and Antipsychotic Exposure (in Chlorpromazine Dosage Equivalents (mg))	-0.16	.27
CVD (%) and Duration of Illness (months)	-0.16	.24
CVD (%) and Chlorpromazine Dosage (mg)	0.10	.50
Total CVV ( $\text{mm}^3$ ) and Duration of Illness (months)	-0.09	.52
Total CVV ( $\text{mm}^3$ ) and Antipsychotic Exposure (in Chlorpromazine Dosage Equivalents (mg))	-0.16	.29
