

Supplementary Materials

Suppl Table 1. Migraine symptoms considered as most troublesome (physician-reported data)

	Overall N = 1112
Most troublesome symptoms, n (%)	
Unilateral pain	592 (53.2)
Bilateral pain	118 (10.6)
Pulsating/throbbing pain	114 (10.3)
Photophobia	11 (1.0)
Phonophobia	13 (1.2)
Sensitivity to smell	4 (0.4)
Pain worsened by activity	94 (8.5)
Sensory aura	15 (1.4)
Nausea	49 (4.4)
Vomiting	6 (0.5)
Visual aura/sight disturbance	10 (0.9)
Muscle weakness/fatigue	15 (1.4)
Light-headedness	79 (7.1)

Abbreviations: N, total number of patients; n, number of patients in each category.

Suppl Table 2. Healthcare resource utilization (physician-reported data)

Healthcare resource	Overall N = 1113
Current consultation due to migraine, n (%)	1111 (99.9)
Patients hospitalized due to migraine in the previous 12 months, n (%)	11 (1.0)
Number of hospital visits due to migraine in the previous 12 months, mean (SD)	
Number of patient consultations conducted in previous 12 months	3.7 (3.1)
Number of different tests used within 12 months	3.5 (1.5)

Continuous variables are reported as mean (SD) for non-missing observations; percentages are calculated as proportion of non-missing data.

Abbreviations: N, total number of patients; n, number of patients in each category; SD, standard deviation.
