

Figure S1. Inhibitory effects of GGD on PD model rat. The writhing numbers (A) and the writhing latency (B) of rats in control (sham) group, PD model group, low-concentration (0.9 g/kg) GGD group, medium-concentration (1.8 g/kg) GGD group, and high-concentration (3.6 g/kg) GGD group. Data are presented as the means \pm SD. ** $P < 0.01$, $n = 6$.
