

**Personalized dose of adjuvant imatinib in patients with
gastrointestinal stromal tumors: results from a population
pharmacokinetic analysis**

Supplementary Figure 1 Pairwise linkage profiles of rs11636419, rs1867351, rs683369, rs2282143, rs10841803, and rs2231142. The number inside the rhombus indicates the R^2 of the specific linkage of two SNPs. $R^2 > 0.8$ is considered to be linked.

Supplementary Figure 2 Covariate correlation analysis plot. The number in the box represents the correlation coefficient of the corresponding two covariates, and an absolute value of the correlation coefficient ≥ 0.5 is considered to indicate a correlation between the two covariates.
