

Radiation Safety					
Timestamp	Please select your role	Have you done laser safety training?	How many urological procedures using Holmium Laser have you participated in?	Eye damage can occur by looking into the "green light beam" even if the laser is not activated	Normal prescription glasses protect against laser induced eye damage

If the laser fibre is activated and there is no intervening barrier (no fluid or solid), what is the minimum distance to avoid injury?	Do you find that the laser protection glasses impair your vision ?	Based on the hazard posed by holmium laser, how would you classify the current laser safety requirements?
