Fixed combination of lercanidipine and enalapril in the management of hypertension; focus on patient preference and adherence [Corrigendum]

On page 452, Table 1: Effect of fixed association of enalapril–lercanidipine on blood pressure control.

The Intervention column data for the 5th reference (Rump61) was incorrectly listed as: Enalapril 10 mg + lercanidipine 10 mg or enalapril 10 mg + lercanidipine 20 mg.

The corrected data is:

Enalapril 10 mg + lercanidipine 10 mg or enalapril 20 mg + lercanidipine 10 mg.
