COPD management costs according to the frequency of COPD exacerbations in UK primary care [Corrigendum]

Punekar YS, Shukla A, Müllerova H. *International Journal of COPD*. 2014;9:65–73.

On page 69, note that there was an error in the bar graph shown in Figure 1. The group with no exacerbations during the 12 months of follow-up should have a zero value for the cost of exacerbations. The corrected figure is provided below.

Figure 1 Costs of COPD treatment (per patient per year) before and after cohort entry date.

Note: ^aClassification based on moderate-to-severe exacerbation frequency in the follow-up period.

Abbreviations: COPD, chronic obstructive pulmonary disease; GP, general practitioner.

The International Journal of COPD is an international, peer-reviewed journal of therapeutics and pharmacology focusing on concise rapid reporting of clinical studies and reviews in COPD. Special focus is given to the pathophysiological processes underlying the disease, intervention programs, patient focused education, and self management protocols.
