Publish your work in this journal

The Journal of Biorepository Science for Applied Medicine is an international, peer-reviewed, open access journal that focuses on new developments and advances in the emerging and evolving field of biorepository science. This includes biospecimen procurement, processing, preservation, and banking for application to applied medicine. The Journal invites submission of manuscripts which address these aspects in addition to systems logic, clinical throughput and ethical issues pertaining to application of

biorepositories and their effects on clinical medicine. The journal is characterized by the rapid reporting of reviews, original research, methodologies, technologies and analytics in this subject area. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
