Patient satisfaction with cardiac rehabilitation: association with utilization, functional capacity, and heart-health behaviors [Corrigendum]

Ali S, Chessex C, Bassett-Gunter R, Grace SL. *Patient Preference and Adherence*. 2017;11:821–830.

(eg, European, Asian) compared to those lost to follow-up. No other differences were observed”.

Page 824, Heart-health behaviors section, third paragraph, the text “Finally, the 4-item version of Morisky Medication Adherence Scale³⁴ was also administered. Response options are “yes” I agree with the statement (scored as 0) or “no” I do not (scored as 1). Responses are summed, and a total score of <4 indicates “non-adherence” should have read “Finally, the 4-item version of Morisky Medication Adherence Scale³⁴ was also administered”.

Page 826, Table 2, the n (%) for Completion under CR utilization (discharge), the data “209 (60.2%)” should have read “247 (60.2%)”.

Page 825, Column 1, second paragraph, the text “As shown in Figure 1, less than half of participants completed the 2-year follow-up survey. Table 1 lists the pre-CR characteristics of participants retained 2 years later versus those lost to follow-up. With regard to sociodemographic characteristics, as shown, retained participants were more likely to self-report “North American” ethnocultural background versus any other origin (eg, European, Asian) compared to those lost to follow-up. With regard to clinical characteristics, retained participants were significantly more likely to have been referred to CR for an indication other than revascularization compared to those lost to follow-up. No other differences were observed” should have read “As shown in Figure 1, less than half of participants completed the 2-year follow-up survey. Table 1 lists the pre-CR characteristics of participants retained 2 years later versus those lost to follow-up. With regard to sociodemographic characteristics, as shown, retained participants were more likely to self-report “North American” ethnocultural background versus any other origin

Page 826, Table 2, Notes section, the text “Independent samples *t*-test. [‡]Analysis of variance. [‡]Adjusted for sex” should have read “Independent samples *t*-test. [‡]Analysis of variance. [‡]Adjusted for sex. MMAS-4 is protected by US and International Trademark and Copyright laws. Permission for use is required.
