

Ultrafine particles in airways: a novel marker of COPD exacerbation risk and inflammatory status [Corrigendum]

Fireman Klein E, Adir Y, Krencel A, et al. *Int J Chron Obstruct Pulmon Dis.* 2019;14:557–564.

The authors have advised that they neglected to mention an acknowledgment for the department in which the research took place, in good faith. The complete acknowledgment details (page 563) are as follows:

Acknowledgments

This work was supported by the Israel Lung Association. We would like to express our deepest gratitude and appreciation to Professor Elad Schiff and the Internal Medicine B Department at the Bnai Zion Medical Center for support, mentoring, and making this study possible.

International Journal of Chronic Obstructive Pulmonary Disease

Dovepress

Publish your work in this journal

The International Journal of COPD is an international, peer-reviewed journal of therapeutics and pharmacology focusing on concise rapid reporting of clinical studies and reviews in COPD. Special focus is given to the pathophysiological processes underlying the disease, intervention programs, patient focused education, and self management

protocols. This journal is indexed on PubMed Central, MedLine and CAS. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
