Tapentadol: an effective option for the treatment of back pain [Corrigendum]

Coluzzi F, Polati E, Freo U, Grilli M. *J Pain Res.* 2019;12:1521–1528.

On page 1523, Table 1 caption should read from “Key elements from clinical trials on tapentadol PR in the treatment of OA-related pain in the nonsurgical setting” to “Key elements from clinical trials on tapentadol PR in the treatment of low back pain”.

Following a review of our data post-publication, we found the incorrect table caption for Table 1. The correct caption for Table 1 is shown in this corrigendum. This correction has no impact to the findings of the study. The authors apologize for this error.

Publish your work in this journal

The Journal of Pain Research is an international, peer reviewed, open access, online journal that welcomes laboratory and clinical findings in the fields of pain research and the prevention and management of pain. Original research, reviews, symposium reports, hypothesis formation and commentaries are all considered for publication. The manuscript

management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
