

Clinical outcomes of 4-point scleral fixated 1-piece hydrophobic acrylic equiconvex intraocular lens using polytetrafluoroethylene suture [Corrigendum]

Patel NA, Shah P, Yannuzzi NA, et al. *Clin Ophthalmol.* 2018;12:2145–2148.

The intraocular lens (Akreos AO60) studied in this paper is made of hydrophilic acrylic material instead of hydro-

phobic acrylic. Therefore, the title of this paper is incorrect and should read “Clinical outcomes of 4-point scleral fixated 1-piece hydrophilic acrylic equiconvex intraocular lens using polytetrafluoroethylene suture”. The authors apologize for this error.

Publish your work in this journal

Clinical Ophthalmology is an international, peer-reviewed journal covering all subspecialties within ophthalmology. Key topics include: Optometry; Visual science; Pharmacology and drug therapy in eye diseases; Basic Sciences; Primary and Secondary eye care; Patient Safety and Quality of Care Improvements. This journal is indexed on PubMed

Central and CAS, and is the official journal of The Society of Clinical Ophthalmology (SCO). The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
