Bipolar Spectrum Disorders And Associated Factors Among Adults Attending An Antiretroviral Therapy Clinic In Gedeo Zone Health Centers, Southern Ethiopia [Corrigendum]

On review of the published manuscript the authors have noticed several errors relating to the medication adherence measurements.

The Morisky, Green and Levine scale (MGL) was actually used in the study, not the MMAS-4 as initially indicated. The use of the terms “Morisky medication adherence scale” and “Morisky 4-item medication adherence scale” on pages 504 and 505, respectively, need to be replaced with “the Morisky, Green and Levine Medication Adherence Scale”.

The authors and the editor have confirmed these changes will have no impact on the conclusions of the study. The authors wish to apologize for this error.
